

In-District Programs

FOR SPECIAL NEEDS STUDENTS

A Top-Grade Partnership Between Privatized Schooling & Public School Districts

Specialized Education Services, Inc. (SESI) — one of the top providers of alternative specialized education in the country — offers targeted, customized specialty services to school districts aiming to comprehensively and optimally meet the needs of special needs students in the public school system. One of these services, our **In-District, In-Classroom Program** option, allows special needs students to stay in their own school and continue taking advantage of all the benefits that school offers while also receiving one-on-one personalized academic and behavioral interventions to address their specific challenges. By hosting SESI's program right on campus and educating the students in the least restrictive environment available to them, SESI and the public school district collaborate to achieve our joint primary goal of integrating students into the public school instructional program to the fullest extent possible — **in your own school ... in your own classrooms.**

★ ★ ★ PROGRAM FEATURES ★ ★ ★

- ✓ The SESI model serves students with particular disabilities, including but not limited to: learning disabilities, health impairments, speech/language deficits, behavioral disorders, and emotional disturbances
- ✓ Flexible programming allows a public school to host a SESI program in just one classroom or in multiple classrooms, depending on need
- ✓ In-school classroom programs are available for all grades and age ranges, K-12, with an average classroom population of 9-12 students and an average teacher-to-student ratio of 1:3.5, with a certified special ed teacher and teacher's assistant in each classroom
- ✓ All SESI program elements meet all state standards and requirements and are tailored to fulfill age-appropriate, disability-specific, grade-level objectives
- ✓ Intensive academic interventions in English/Language Arts, Math, Science, and Social Studies
- ✓ Intensive Remedial Reading interventions incorporate computerized learning and state-of-the-art software and methodologies
- ✓ The comprehensive Behavioral Management System implemented in all our programs ensures safety, structure, and discipline
- ✓ Continuity is maintained throughout the child's curriculum, with the SESI program and host school sharing that school's materials, equipment, resources, and amenities
- ✓ Full-day or partial-day curriculums available based on individual IEPs, so that students can attend the SESI program only for those portions of their curriculum best met in an alternative setting while also participating in school-wide events and same-grade classes with peers whenever appropriate
- ✓ The SESI program follows the school's schedule — the same school hours, lunch times, holidays, etc. — so there's no interruption of standard operating policies and procedures throughout the school
- ✓ Single-year or multi-year contracts available
