The High Road Academy – Wallingford Campus (formerly known as the High Road Student Learning Center) is a privately owned, state-approved special education day school that serves students facing learning, language, and social challenges. Our individualized educational program features one-on-one and small group interactive learning, supplemented by integrated computer technology in every classroom; and our unique behavioral management system simultaneously directs young adults to control their impulses, accept responsibility, and self-monitor their behavior. We also equip our high school students with social skills/life skills training that teaches them how to communicate effectively, to function appropriately in society, and to build fulfilling peer relationships, whereas the transitional components of our program prepare them for post-graduation continuing education and/or careers suited to their particular aptitudes and interests.

Above all else, the High Road Academy is committed to the success of all of our students on all fronts — in school, at home, and in the community — so we custom-design our curriculums to address the strengths and needs of each child, and then we implement our initiatives in a warm and nurturing environment characterized by small class sizes, personal attention, and positive reinforcement.

In this way, we're able to meet all students at their own performance level and create new pathways to higher levels of academic achievement and skills acquisition en route to more productive and promising futures.
